Some examples of Lexter runs

In the table below, a number of test runs using Lexter are listed. The run files can be loaded into the shell. The work directory is always d:\uitvoer, but one can change this according to one's specific needs. The datafile location is always at d:\invoer, but this can also be changed.

All the output produced by Lexter is also present in the zip file, including the axillary directories produced by Lexter to support the creation of graphics. The latter directories need not be present upon installation, Lexter creates them automatically.

RUNFILE	Options chosen
zeer_klein.TTT0	1PLM, 2 booklets fit statistics, information functions, graphics
zeer_klein_simulatie.TTT0	2PLM, 2 booklets, data simulation, with dummy data input and fixed item parameters
TEST.TTT0	2PLM, 4 booklets, fit statistics, information functions, graphics
TEST_klein.TTT0	2PLM, 4 booklets, fit statistics, information functions, graphics, ability parameters, fixed item parameters
abc_Taal.TTT0	CAT, 2PLM, fixed item parameters, fit statistics, graphics
lexter_simulation_package0.TTT0	2PLM, 4 booklets, information values, fit statistics, graphics WML estimates ability
lexter_simulation_package1.TTT0	2PLM, 4 booklets, information values, fit statistics, graphics ML, WML, EAP estimates ability
lexter_simulation_package2.TTT0	2PLM, 4 booklets, information values, fit statistics, data simulation
LINEAR_BIG.TTT0	1PLM, 8 booklets, information values, fit statistics, graphics
LINEAR_BIG_simulate.TTT0	1PLM, 8 booklets, fit statistics, data simulation
WOORDENSCHAT.TTT0	2PLM, 3 booklets, fit statistics, graphics
WOORDENSCHAT_SIMULATIE.TTT0	2PLM, 3 booklets, data simulation, with dummy data input and fixed item parameters
CAT_SIMULATIE.TTT0	CAT, 2PLM, fixed item parameters, data simulation
CAT_SIMULATIE_TEST1.TTT0	CAT, 1PLM
CAT_SIMULATIE_TEST3.TTT0	CAT, 1PLM, information values, graphics
